AROUND TOWN

Mat Hostland has purchased the Dyvig homestead.

Al Cole and the News Staff motored to Suffield on Monday.

A. D. Thompson wants a stoker. Will pay good wages.

Suffield is making big arrangements for a Fall Fair to be held soon.

Miss Lottie Hostland of Ronslane is visiting in town.

Miss Queenie Tabor of Medicine Hat is conducting her class in Piano forte in town to-day. Thursday.

Mrs. E. K. Johnson and Herbert Johnson motored to Banff last Friday on a holiday trip.

Mrs. E. C. Hegy and daughter Ruth left Saturday last to attend the Vancouver exhibition.

Chris Gleddy has purchased the Derny Russell homestead. This addition gives Mr. Gleddy a full section of land.

Alderson School will re-open on Monday Aug. 21st. The teachers engaged are Mrs. Emery and Miss Seymour.

S. Farmer of the Helgoland district is facing a charge of Sedition at Medicine Hat.

A number from town intend attending a dance on Saturday evening at the home of Andy Lemberg, north of town.

Send in your renewal to the News. Do it now.

The Ladies of the W. A. had a successful meeting yesterday Wednesday at the residence of Mrs. Guy Hamilton.

Miss M. Russell and Earl Russell who have been holidaying in Camargay for several weeks returned home on Tuesday. Mrs. Geo. Russell met them at the Hat.

Pete Nelson left on a trip last Wednesday night. Pete said, he might go to Medicine Hat and he might go to Montreal. At any rate we understand it is Pete's Honey-moon trip.

The Calgary papers report that the Misses Florence Stuart, Muriel Hall, and Evelyn Hammer and Messrs George A. Dixon, Egbert Jones and Robert Gish were successful in passing their School leaving exams.

"Four-Ninety"

\$675.

f. o. b. Oshawa

Both cars completely equipped.

This includes Speedometer, Electric lighting and starting system.

SCOLLARD & HEKY, Agents

Registration

The daily papers on Wednesday announced the fact that the Ottawa Government will introduce in Canada a short form of registration for men of Soldier age. The exact form that the Registration will take place has not been given out. But it is expected to be a municipality registration. Probably all men of certain age will be asked to attend a Magistrate's Court and state their willingness or unwillingness to enlist for the war in Europe. Canada has enlisted in round figures about 365,000 men and aims to enlist in all 500,000.

Miss Florence Northam of Medicine Hat is a guest of Miss Koopman of Tide Lake.

Norwegian Church Service in Alderson Schoolhouse on Sunday, Aug. 27th at 2 p. m.

The latest to purchase Ford cars from N. E. Stuart local dealer are J. M. Caines, Roy Caines and Lars Kaldstad. He has made the remarkable record of 9 Ford sales since the first of August.

A number of the soldiers of the 175th are in town to assist in the harvest. Privates Adams, Nelson, Stewart and Glenn arrived on Tuesday.

Mr. and Mrs. Geo. Beatty and family spent last week in Bow Island. Miss Katherine Harrington of Bow Island returned with them on Monday and will be their guest for a few days.

Private Roy Woolven and Private Billy Pallin arrived in town to-day from Sarcee Camp, Calgary and will work in the harvest for the next month.

It is stated that while digging a well on the Kaldstad Farm, next town that a body was exhumed. The report also states the clothing appeared to be that of an American soldier. The Mounted Police are investigating the discovery.

The implement business is sure humbling along in town. Scollard and Hegy report the sales of 51 binders.

The Calgary papers report that the Misses Florence Stuart, Muriel Hall, and Evelyn Hammer and Messrs George A. Dixon, Egbert Jones and Robert Gish were successful in passing their School leaving exams.

CHAPTER XXXIV

"He will love you with the best love." The words had haunted Daphne since the day she had said them. The two women had partaken of a feeling of real trust and affection, and it was this that caused Daphne to feel pleasure, when Nina wrote to say she had rejoined her husband and that he was very kind to her.

"He is so much a man," she said, "I believe some day we shall really learn to understand each other, and I will try to tell him all about you. Will the day of your heart come to you?"

"It will love you with the best love, and the day of your heart comes in Daphne's mind often. After noon, as she lay slowly along the lane towards the hazel cope, and the tawny woods, she heard the rustling of the leaves in the wind, with the distant chime of the church bells.

The elm trees stood like golden sentinels in the hedgerows; the hazels were golden, the beeches flamed orange and red, and there was a dusky copper time upon the hills. The sun had crept ed the cope like a field of the cloth of gold, and over the old men's hats, the leaves were golden, and the greybes amongst the crimson berries of box rose and Hawthorn. But was it not the glory of the trees which appealed most to Daphne's heart?

"An golden world," she whispered, as she stood looking out over the burning landscape.

Her thoughts were interrupted. A familiar footstep set her pulses throb-bing, and the next moment, Helen'Brien, the maid, slowly came round the bend of the lane. His heart was a bitter, burning pain, and though he lacked energy or strength, when he saw Daphne, he stood stock still, and his face was pale, and his eyes, with such an expression of haggard misery, that the girl's heart ached.

"Hugh," she said impulsively, both hands outstretched towards him, "why have you come? Why have you never come to see us? We heard you had been staying in Germany, and we never come near Demberton, and we want to hear about Bedminster, about the old place, about you. She she ended softly, "why have you never come?"

"I have," he said heavily, a little light coming into his eyes, at her impulsive words. "Now come and see me. I have been staying in Germany, as it seems, as an ordinary acquaintance, but I have come to see you about the end of the world. I am old, I care no more and see you with any other thought in my mind."

"What?" Daphne gasped. Daphne bravely though the color came and went in her face.

"I have come, as I said, as I see now that I have been a fool, have learnt too late that it is you who are the best, and when I thought you had come to see me, I was afraid of you. It was sheer madness."

"You want me?" she broke in breathlessly, her hands still held tight. "I have found that you want me, Hugh?"

"I know that you are an emigrant, I am sure, and when I thought you had come to see me, I was afraid of you. You always rested me, Daphne, you always made me feel safe, and when I thought you whatever is good in me if you are there to help me, I love you with all my heart."

"May the joy of your heart come to you, Nina's words rang in Daphne's ear, and a smile flashed over her face.

"Oh! Hugh," she whispered, "I have seen her terms about to her heart."

"But I thought you didn't care enough about me to marry me," he said, after a moment. "I thought you found me too poor, and I was ever promising to be my wife."

"I always cared," she whispered, her eyes filling with tears, "but I wanted you happiness most, and so—

"You knew what a fool I was, you knew that I was too poor, and you forgave me then, you forgive me now, and when I am dead, in my voice, I will say in my eyes, 'you can forgive a skunk like me!'

"I can forgive the man I love," she answered, "but I can't forgive you, because I love him, forgive him always, not until seven times seven, but until seven times seven."

THE END

Germany's Great Idea

In a leading article, "The Vossische Zeitung," an influential paper, commends in a long article, the proposal to make the interior roads in Germany in a knowledge of the language.

It says: "Teach these English, French, and Russians, and you remove the main cause of the growing animosity and sympathy for Germans and their cause. A Breton at the camp outside of Leningrad, who signed the proposal—submitted to the men at an evening meeting—'if you want to encourage sympathy, give me better grub.'

Judge—This man was a stranger to you! Then why did you pick a fight with him? He is your friend, is he not on your vacations?

Development of Submarine Like Great Liner

Sir Joseph Compton Rickett, M. P., has given his opinion on the future of the submarine. Very soon, he avers, "the Atlantic will be a mine of oil." The submarine will be a deep trawler of warships or liners, submerged and conducted with impunity from weather.

Germany has said that she is building a fleet of ships that will be able to carry men and passengers to America. There is really no limit to their water in which they will have to operate.

The submarines of today will be the exhibit of a future museum like the old pocket, the pioneer, compared with the early twentieth century specimens. The day of the submarine will resemble an Atlantic liner, breasting a river steamboat.

In the future, we shall adopt the submarine as a liner. The safety of the sea depths will provide the port of safety for the great liners. The submarine will pass freely from continent to continent. On quiet days we may be able to escape the buffet of storm or the hull of shell. The freedom of the sea will be a fact.

"Having become amphibious we can enter the ocean in the best way suited to our purpose. A battle fleet will be as safe in the ocean as in the wharves. Forty feet below the surface all submerged vessels, but it is doubtful whether the vibration of water will convey sufficient information.

A German Prediction

Written Three Days Before the Great Offensive

We must be prepared to the Germans. And as no proverbs are their proverbs, we must be prepared to the Germans. Their breaking in Paris has also to be postponed. Liege was to be taken in a week, and Petrograd, if we mistake not, was to listen to the orchestra of German guns.

The contest is one between two ideals of life. The German ideal is that the allies can accept, and a peace that would be only a truce is not possible.

All this ought to be plain to Americans, though many of us apparently are not. A battle fleet will be as safe in the ocean as in the wharves. Forty feet below the surface all submerged vessels, but it is doubtful whether the vibration of water will convey sufficient information.

Terms of Peace

American Paper Comments on Opinion Expressed by Lord Bryce

No Englishman has a higher place in the esteem of the American public than that of the late Lord Bryce. In his opinion on the war, he has said, of the reasons why the allies cannot consent to a permanent peace will be the same as those which he gave in any official pronouncement would have.

Speaking at a luncheon in New York, he said that he had received an address, signed by some Americans, from Germany, urging that, since the war must end in a draw, the allies should be asked to make further bloodshed.

The plea is not new, but it is not in so many words, by the German government.

As Lord Bryce has said, the war has been the gathering of part of the world, and the world is now a great Britain.

In the future, we shall cover our communications, so, in time of war we shall adopt the submarine as a liner. The safety of the sea depths will provide the port of safety for the great liners.

The submarine will pass freely from continent to continent. On quiet days we may be able to escape the buffet of storm or the hull of shell. The freedom of the sea will be a fact.

"Having become amphibious we can enter the ocean in the best way suited to our purpose. A battle fleet will be as safe in the ocean as in the wharves. Forty feet below the surface all submerged vessels, but it is doubtful whether the vibration of water will convey sufficient information.

Boy Scout Movement

Valuable Work Done by the Boy Scouts in Connection With the War

No Englishman has a higher place in the esteem of the American public than that of the late Lord Bryce. From spying out enemy colonies to digging latrines, they have a fine record.

Their efforts to aid the Empire in this time of stress and strain will long be remembered.

They are loading vans, collecting parcels, wheeling trolleys, and helping to sort the mail.

They are sending to the troops.

They are providing a great deal of work for the boys.

They are providing a great deal of work for the boys.

They are providing a great deal of work for the boys.

Mecca's Stone of Tears

Tradition Says it Was Once Pure White, But is Now Black From Many Tears

Year by year a great pilgrimage consisting of from 200,000 to 300,000 Moslems, make the journey to Mecca, and on these occasions that dare to associate with such an enterprise, and endeavored to gain access to the Holy Land.

They are sending to the Moslem world, which has been an annual pilgrimage for centuries.

Various theories have been advanced to account for the change in the color of the stone.

It is believed that the stone is caused by the action of the sun upon the stone.

It is also believed that the stone is caused by the action of the water upon the stone.

It is also believed that the stone is caused by the action of the water upon the stone.

Thunderstorms and Milk

Lowering of Atmospheric Pressure Believed to be One Cause of Milk Turning Sour

It is common knowledge that milk turns sour and curdles more quickly during thunderstorms than it does in normal weather.

Various theories have been advanced to account for this. One quite recently suggested that the phenomena is related to the fact that the pressure of the atmosphere is lower during thunderstorms than it is during normal weather.

Lightning has been suggested as a cause of the change in the taste of the milk.

It is also suggested that the change in the taste of the milk is due to the action of the bacteria.

It is also suggested that the change in the taste of the milk is due to the action of the bacteria.

Echo of Waterloo

Grandson of "Marshall Forward" Prince Cobhardt Blucher, son of Walstatt, grandson of the first and most Prince Blucher of Waterloo and the man who died in a fall from his horse near Brussels.

The grandson of old "Marshall Forward" is still alive. For many years prior to the outbreak of the war he lived in England, and in 1914 he returned to Germany and declared he had forfeited his seat in that body.

Prince Blucher carried on a legal warfare with the city of Berlin over taxation and similar matters, for the greater part of his life.

He died in 1914, and the city was compelled to give up its claim, but he died without a cent to his name.

His son died in 1914, and his son, the present Prince Blucher of Waterloo, is the only member of the family left.

He is the only member of the family left.

To have the children sound and strong in the first care of a mother.

They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

We need the plain, honest truths about worms to school graduates. The stories you tell of worms are full of a self-centered notion that the world is under obligation to them, and that they are the only ones that have enough to live without manual labor.

A man or woman who does not at some time in his or her life experience of manual labor has a poor chance to win and to be pitied.—E. C. Cook in American Agriculturalist.

Exhibition War Superstitions

Professor Archibald of the Royal Agricultural College has recently organized an interesting exhibition, which is being presented by all classes of people. It is principally made up of amulets and charms of all sorts carried by German soldiers in the field, and the superstitions in possession of the Kaiser are on display.

A particularly popular object advertised as possessing occult properties, which is being sold in huge quantities at 2½-2d, is a copy of an unfailing shield against all hateful persons, witchcraft, and works of the devil.

H.B.N.K. it declares that "at the command of the Angel Michael all come and come to him who carries this letter with him."

No letters from the Kaiser are on exhibition.

Nothing New Under the Sun

Aeroplanes and Submarines Are Said to Be Centuries Old

According to researches by a French professor, it would appear that man has had aeroplanes as well as aeroplanes, which is as well known, involve ideas which are centuries old.

It also appears that submarines were built as early as the beginning of the Christian era, and that of the invention is older still. Aristotle tells how Alexander the Great made use of a submarine, which he named Tyre more than 300 years before Christ.

The Dutchman named Cornelius Van Drebel astounded London in 1620 with a submarine that held twelve oars and was built in such a hull, among whom was King James I, a man of great wealth, who was to be constructed of metal so as to be watertight and able to resist the pressure of the sea.

In 1537 a ship with twenty cannon, eighty sailors, and many bags of money, had to blow up and sank in the port of Dieppe.

Three years later a Frenchman, Flavelle, built a boat according to the old monk's ideas, a submarine with which he promised to rescue the battle of St. Omer, but it was a wreck and probably some pieces of artillery.

The Great Pacific, then a little boy was an eye-witness to the experiments of Prud'homme, which were carried on till 1640.

But it is not on record that any of these submarines were murderers of little children.

Eggs and Poultry Trade

The Western Canadian Farmers' Great Opportunity to Build Up a Poultry Industry

Perhaps never again will Canadian Farmers have such a wonderful opportunity presented to them of developing a great, profitable, and abiding egg and poultry trade with the United States and Europe in their way today; and most assuredly, if this great opportunity is grasped promptly, the result will be a poultry industry of such magnitude and prominence as has never been dreamed of.

There is a demand in the British market for eggs and poultry such as has never been known. The imports into Great Britain increased from 17,883,884 to 21,500,000.

On to war conditions it is estimated that for 1915 and 1916 at least 100,000,000 eggs will be required.

Announcements of entertainments, etc., 10¢ per line each subsequent insertion.
Conducted by church, society, etc., display advertising rates on application.

SUBSCRIPTION: \$1.50 per year

THURSDAY, AUGUST 17TH, 1916

The Editor of the News returned on Monday from a few weeks visit at Saskatoon. "While east we had the pleasure of visiting both Regina and Saskatoon Exhibitions. They were both very successful and the best in the history of the two cities. The Stock exhibit at Saskatoon was remarkably complete.

As far as crops go Southern Alberta will have the banner year again this year. Saskatchewan crops are two weeks behind last year and the farmers are already on the anxious seat as regards early frost. The price will be better than ever this fall. We heard wagers laid in Saskatchewan that wheat would pass the \$2.00 mark before January 1st. The parties were assuming and we think rightly that the crops in Saskatchewan and Manitoba were greatly over-estimated. The only crops that will apparently come up to expectations are those in Southern Alberta.

Happy Days

A man who was boasting of his patriotism recently wrote to his editor that he had employed a lady Chauffeur and she was doing fine. "We are so glad" was the editor's comment.

FOR SALE

AT

The Alderson News Office

Butter wrappers \$3 per 1000

Harvest Help

The Department of Agriculture has arranged with the railway companies to grant a rate of one cent per mile with minimum of \$1.50 for harvest help to all points within the province upon presentation of certificates signed by Mr. Charles S. Hotchkiss, Chief Publicity Commissioner, Edmonton, valid during the month of August.

These certificates may be obtained from Mr. J. A. Weir at Lethbridge, Mr. H. J. Donnelly, Crown Building, First street East, Calgary or at the office of above mentioned Mr. Hotchkiss.

Farmers requiring farm help should apply direct to the above, and to Mr. L. L. Hartman at Sarsse Camp, where the Department of Agriculture has opened an office to assist in obtaining soldiers for harvest help.

AUCTION SALE OF FARM LAND

Under the provisions of the Land Titles Act there will be offered for sale by Harry W. Johnson, Auctioneer, at the Alderson Hotel, Alderson, Alberta, on Saturday the ninth day of September, 1916, at 2 o'clock p.m., THE SOUTH EAST QUARTER OF SECTION-32, TOWNSHIP 14, RANGE 10, W. OF THE 4th MERIDIAN, IN THE PROVINCE OF ALBERTA.

The Soil is a chocolate loam with a clay sub-soil; 45 acres have been broken and were under crop last year and the balance of the quarter section can be easily cultivated; there is on the property a dwelling house 24 x 24 with shingle roof, a barn 10 x 20 and 2 rooms of 10 x 12 with straw and board wainscoting; across the lane is 41 miles from Alderson Station and Post Office and 14 miles from a school and in a district fairly well settled.

It will be subject to a sealed bid, free from encumbrances except taxes for the current year. Terms of sale: 10% cash at time of sale, balance according to favorable terms.

For further particulars apply to WALLBRIDGE, HENWOOD, GIBSON & MILLS, Solicitors, for the Vendors.

DATED THIS ninth day of June 1916, at Calgary, Alberta.

Farmers who have placed orders for Binder Twine with Scotland and Heagy can receive same now.

The N. E. Stuart Co. wish to announce that their elevator will be open continuously all fall.

Church Notices

CHURCH OF ENGLAND

Rev. A. Cyril Swainson, Vicar, Aug. 20 9th Sunday after Trinity. SUFFIELD, Holy Communion 11 a.m. Alderson, Evensong 7.30 p.m.

METHODIST SERVICES

Alderson: 7.30 p.m.; Sunday School 11 a.m.
A cordial invitation is extended to all to attend these services.
Fertile Flats 8 p.m.

GEORGE RUSSELL, Proprietor.

Buy an Irrigated Farm FROM THE CANADIAN PACIFIC RAILWAY

BECAUSE

Irrigation makes the farmer independent of rain and insures good crops, not occasionally, but **every year**.

Irrigation makes possible the successful culture of alfalfa, the king of fodders, which insures best returns in dairy and mixed farming.

Irrigation means intensive farming and close settlement with all the advantages of a densely populated agricultural community.

Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the year 1914 having absolutely demonstrated its success wherever intelligently applied.

You can buy irrigated land from the Canadian Pacific Railway at prices ranging from \$35 to \$75 per acre, with twenty years to pay and the sum of \$1000 of a loan of \$2,000.00 for improvements (6% interest); the principal to be paid at the end of first and second years and no water rates for first instances.

This is the most liberal offer of irrigated land on record.

GOOD WORK OF DOMINIONS HAS BEEN REVELATION TO THE WORLD

GEN. ROBERTSON ON SOME PHASES OF THE WAR

Expresses High Appreciation of the Splendid Fighting Spirit, And Well Organized Canadian Armies, Which Have Demonstrated the Quality of Manhood.

"No, we really are not worried by the course of the war," said General Sir William R. Robertson, chief of the imperial staff, at army headquarters, in London, to a representative of the Associated Press.

"As to this new offensive, a glance at the map will tell the story of our progress. And the happy expression of the Canadian soldiers in front reflects the spirit of the men. Do you notice that all published critics seem to show them smiling or laughing?"

The general himself, however, had subtly conveyed his realization of the fact that he was breaking the seal of his silence by this slight smile at the beginning of the war. He received the correspondence, while seated at a table, with his wife, ten-year-old son, feet of the wire which permits him, with the aid of maps and the constant aid of his staff, to follow every move in the conflict in France.

The general is keeping with the character of the Canadian soldier, with such Spartan simplicity that the table, charts and map rack are the only ones.

"Our hearts were touched by the ready response of our fellow citizens to the call for the outbreak of the war," the general continued. "To us, as we are progressive, it is a matter of common sentiment. If the man in which these sons of ours of Canada and our gallant little Newfoundland came forward with their hearts full of enthusiasm, valor and gallantry in battle were a revelation to the world."

"We feel that our type of government is not so bad after all. Yes, they are still coming, and while we are not yet in the particular parts of the empire, the Canadians can learn again through you, the press, the spirit of the splendid fighting spirit and well-organized Canadian forces, and many other closely connected engagements they demonstrated the high type of manhood which the world has seen in the new world."

The subject of general speculation as to the cause of the war has caused the general to shake his head and smile.

"There is a question touching human nature, which means dealing with a dubious proposition," he said. "None is to be found."

Referring to the complimentary references by many critics to the use of the most of the British guns and the use of cavalry, in the offensive. Sir William said: "The use of British guns interests us not only because of the organization required to produce them, but also because of the arduous training which is necessary before the gunners are proficient. Scientifically accurate gunnery requires intense practice, and was probably as never before. The necessity of firing over the heads of the troops, and the resulting inaccuracy, makes it so, and it is necessary that troops thus advancing have perfect confidence in the gunners."

A Hero of France

A Visible Symbol of All That France Has Suffered in the War

But it is General Gouraud who more than anyone else perhaps has touched the sensitive heart of the nation of the army. This is due in some measures no doubt to the pathos of his story, and his having lost his right arm and had both legs broken, and as he limps rapidly along the streets of Paris, he looks like the visible symbol of all that France has suffered in these terrible days. He is not only more than the physical appeal is the spiritual appeal of a personality of extraordinary strength. His story looks out through the blues eyes I have seen with a caustic, a commanding, and a strangely moving. "I see to all Africa in this most wonderful eye," he is reported to me, referring to the fact that it was in Mauritania and to the south of the Sahara that he was born. It is the soul of France that looks out through his eyes, and soul of a nation which is measuring its passion for humanity against the passion of all might.—A.G.G., in London.

Why Prussia Makes War

The war of 1866 was entered on, not because the existence of Prussia was a threat to the rest of Europe, but because the public opinion and the voice of the people—it was a struggle, long foreseen, and as it turned out, well-named as a necessity by the cabinet, not for territorial aggrandizement or material gain, but for a war and—the establishment of power. Not a foot of land was exacted from Austria, nor did Prussia seek to dominate all part in the hegemony of Germany—From Moltke's History of the "Prussian War."

The manner of a big department

store is having every employee take swimming lessons before the employee is given a chance to work.

There's a sensible "d" way to do it.

One of the best ways we have

found to give our men a chance to exercise in the winter time is to supply them with unthirsting grain to eat.

It is the best way to do it, and it is all excellent for them to do.

We always have a swimmer in the

pool so that we can supply

one or more bundles to every two.

It is the best way to do it.

Army Life Not A Drag

According to the reports of Sarcee Camp happenings, life in the army is not the drag and drudge of training which it is thought to be. The soldiers at that military center have gone in for athletics in a way that is pleasing to outsiders as well as being a beneficial form of amusement for those in the camp. A boxing tournament held recently is said to have been the best ever held in the Province under amateur rules. Two baseball leagues have been formed and games are played nightly on two different diamonds within the camp. Football is holding its own at the head of athletics and many sliding games are witnessed among the lads in training. Tennis is soon to be started and in fact every kind of outdoor games is indulged in daily by the soldiers.

In all these contests the 113th Highlanders are taking a prominent part and are more than holding their own. The unit now has a baseball team en route to Southern Alberta and the name is being brought to the front by the conduct of the lads on the trip.

The Highlanders are still in need of a few men to fill their ranks and every able bodied man in this section is asked to seriously consider the question of duty to himself and to his country. The call is sounding in every man's—there are some who would answer if they could, and there are many who could answer if he would. It is the latter class that Captain McIver in charge of the Highlanders recruiting staff, is anxious to get in touch and he asks that all such write him at the recruiting office at Calgary.

If you are physically fit, write the general officer, and your letter will receive every attention. Transportation to Calgary can be arranged. Why not make up your mind now and help in fitting out another regiment for overseas service? Those in the ranks are ready and eager to go. They need your help. Will you come?

For Sale or Trade—10 good hogs weight about 300 lbs. each, some splendid sows with litters. Will trade. Inquire A. Duschener, Tilley.

WANTED—Threshing outfit for 800 acres good wheat and oats. Rightly assured 300 acres alongside. Inquire at once A. Duschener, Tilley.

Hail

As the News goes to press we learn that a severe hail storm visited the district north of Tides Lake Wednesday night. Among the residents who lost their crops were Messrs. Wies and Bryson. Mr. Kojpman had a crop of 70 acres of wheat in 4 miles north of his home place and the 70 acres is a total loss. The full extent of the damage is not known but it certainly was a serious loss.

Among the the farmers that are into the midst of harvesting are Messrs. Wies and Bryson. Fine crops are to both these men. The News will keep you posted on the latest Crop Stories. Send them in. While they're running send the news to your friends in the States. For the balance of the rest the news will be 50cts. to the U. S. A.

The Picture House was crowded to the doors on Tuesday night to witness Charlie Chaplin in The Floorwalker. Regular prices will be again at Fridays performances. Six big reels of pictures. Doors open 8.00 show commence 8.30 p.m. One show only. Mr. Moore will purchase the piano at present in the Adams Hall.

Work on the Drummond store addition on Broadway will start at once. A complete line of furniture will be placed by Mr. Drummond in the new store. It is said that Parties in town will also erect another commodious building on the remaining lot between the Hotel Alderson and the Drummond store.

There are a number of bills due the News for Printing. These have all been rendered several times and must be paid before Aug. 31st or they will be placed in other hands for collection. Printing must be cash.

Rev. Cyril Swanson, who has been the beloved Rector of Alderson and Suffield Anglican Churches for two years announced at the service here last week that he had been transferred to the Calgary Diocese and would be leaving for his new appointment after next Sunday. This will be regretted by many as it practically means that for a time St. Mary's Church will be closed.
